24/24 PICKUP™ GUARANTEE

24-minute Guarantee applies from timestamp on order confirmation email until the time order is ready for customer pickup. Guarantee excludes customer wait time in store lines. Offer valid on orders placed at circuitcity.com or by phone during pickup store's normal operating hours up to 30 minutes prior to closing. Guarantee not valid the day after Thanksgiving, 12/26 or 12/27. \$25 minimum purchase. One \$24 gift card offered per qualifying in-store pickup ticket, which must be claimed at time of pickup and is good for future purchases.

UNBEATABLE PRICES GUARANTEED

Nothing's worse than paying too much. That's why we do everything in our power to make sure you don't pay a penny more than you should for anything you buy at Circuit City. If you've seen a lower advertised price from another local store with the same item in stock, we want to know about it. Bring it to our attention and we'll gladly beat their price by 10% of the difference. Even after your Circuit City purchase, if you see a lower advertised price (including our own sale prices) within 30 days, we'll gladly refund the difference. Our policy applies only to advertised prices. It does not apply to special offers or promotions, including rebates, free-with-purchase offers and special financing.

RETURN GUARANTEE

If you're not completely satisfied with a product, Circuit City will gladly exchange or refund your purchase within 30 days of the sale date, except as noted below. Digital cameras, camcorders, desktop PCs, notebook PCs, monitors, digital media projectors, printers, scanners, handheld GPS units (portable and in-car), mobile telematics and GPS units, portable and mobile video players and radar detectors must be returned within 14 days of the sale date and (except where prohibited by law) are subject to a 15% restocking fee if returned opened or in a non-factory sealed box. There is no restocking fee for defective product returned in exchange for the exact same product, or for product originally purchased as Open Box. For any exchange or refund, we need the original receipt or a record of the purchase in our system, and the product must be in its original condition, including the box, UPC, bar code, packaging and all accessories. Opened software, music, games and movies may be exchanged for the same title only. Charges for Installation and delivery services are non-refundable after the services have been performed. Refunds are issued in the original payment type. Refunds on check purchases less than 14 days old and in excess of \$100 are issued by check from our corporate office within 14 days of the return date. Please see circuitcity.com for our online return guarantee, which may differ from this guarantee. Restocking fees do not apply to the return of a purchase made from a Hawaii address. Circuit City is not responsible for contacting wireless carriers regarding changes or cancellations of your service plan.

RETURN GUIDELINES

ORDER CANCELLATIONS

We are unable to refund any purchase from the circuitcity.com site from the time your order is placed until you receive your product. If you are not completely satisfied with your purchase, please review our return guarantee for online purchases, then determine whether you want to make an in-store or mail return.

MAIL RETURNS

Please note merchandise purchased at a local Circuit City store can't be returned via mail.

WHAT YOU NEED TO DO

Merchandise purchased online through circuitcity.com (regardless of whether you picked it up at a store or had it delivered), which meets the return guidelines for online purchases, may be returned via mail. Before returning anything by mail, you first must obtain a Return Authorization ("RA"). Any returns without a pre-approved RA may be refused without notice, automatically returned and a handling fee may be assessed. An RA is valid for 10 days.

HOW THE PROCESS WORKS

You will be responsible for all shipping and insurance charges for returns, unless otherwise indicated. If you choose not to insure your package, and we do not accept return of the product, you will be responsible for any loss or damage. Upon our acceptance of the merchandise in like-new condition in conformity with this policy, the purchase price will be credited to the credit card used for the original purchase. For merchandise purchased with a gift card as the sole payment method, we will refund the balance due to you back to a new gift card unless the balance is less than \$5 or prohibited by law. Allow 14 days (not including delivery time for mail refunds) from when we accept your returned product for the processing of your credit. Additional charges may be assessed for products returned with any missing items, such as manuals and accessories. For products that we verify to be defective, we will reimburse you for your original shipping expenses.

IN-STORE RETURNS

If you return your merchandise to one of our stores, a credit will be issued to the credit card used for the original purchase. For merchandise purchased with a gift card as the sole payment method, we will refund the balance due to you back to a new gift card unless the balance is less than \$5 or prohibited by law.

MISSING ACCESSORIES

The value of missing items will be deducted from the credit amount of a return. For exchanges, we will exchange what the customer returns (e.g., box for box, manual for manual, etc.)

PROMOTIONAL PACKAGES

Returns for promotional package items will only be accepted if all components of the promotional package are returned. Individual package components may be exchanged if defective.

TECH TIP

DIGITAL VS. OPTICAL ZOOM:

Digital zoom maintains the integrity of photos from a distance. Digital zoom enlarges a portion of the picture and magnifies it back to size, effecting the quality of the photo.

TECH TIP

Experts agree the first step to great prints is a color-corrected monitor! There's a reason your colors aren't always true. Digital images on your monitor are not necessarily accurate. Computer monitors wear out over time; even new monitors require a color tune-up to provide true color. With color calibration tools even point-and-shooters can see professional quality results with true color on-screen.

TECH TIP

MINI DV VS. MINI DVD:

MINI DV is a popular, extremely compact format that provides an incredibly sharp picture (up to 520 lines of resolution) and detailed color, all in a cassette barely 2.5" long and a half-inch thick. You can playback Mini DV cassettes in your camcorder or on TV via your VHS system.

MINI DVD records directly to a durable, long-lasting disc that can be played in most DVD players and is great for sharing with family and friends. MiniDVD camcorders also use rewritable discs that can be re-recorded again and again.

The Basics...

The bigger your playlist the more memory you'll need. Translation: if a few hundred tunes at your fingertips sounds about right, go with a flash player. But if you get no satisfaction without your total collection in tow, knock yourself out with a hard-drive player that ranges from 6 to 60 gigs and holds as many as 15,000 songs. Check out our chart for more info...

WANNA BE COMPATIBLE?

No problem! Most MP3 players are compatible with any PC loaded with Windows 98-SE or newer and a USB input. Plus, all iPods® are in-sync with iTunes – the super-easy way to get music onto your iPod® – any iPod®. iTunes only compatible with Windows XP and 2000.

GOT MP3 SONGS?

If you're just starting out in the MP3 world, you probably don't...but our quick fix recommendations can have you straining the top of your playlist range in no time...

1. Turn your CD collection into MP3 files.

Today's MP3 players come with software that can convert your CDs in a click. And now, even records or cassettes can go MP3 with the right software.

2. Download 'til you drop.

Download all the songs you crave from the hottest Internet sites like iTunes®, Yahoo! Music® Unlimited and

eMUSIC®. Don't steal music.

FLASH PLAYERS

Key word: easy. Easy to use, easy to carry. These players can take the bumps and bruises of workouts, jogs and the go-go lifestyle without skipping a beat. They're small, sleek and get longer battery life – but flash memory limits their storage capacity, topping out at 6GB – or about 1500 of your hit-list songs.

HARD-DRIVE PLAYERS

Key word: memory. These players pack a hard drive like a computer that ranges up to 60GB of pure music, photo and video storage. Typically a bit larger and huskier than their flash counterparts, hard-drive MP3s are the perfect choice for home, car or office jams.

iPOD VIDEO: IT'LL BLOW YOUR MIND!
